IEE Proceedings Part B
Electric Power Applications
Vol. 129, 1982

ABBREVIATIONS

- **p** Paper, address or lecture
- **d** Discussion on a paper
- **a** Abstract of paper or address
- **e** Errata
- **s** Synopsis of a paper published in full in another Part of the IEE Proceedings

Subject index

COMPUTER-AIDED DESIGN

Computer-aided design of PWM inverter systems. S.R.Bowes and R.R.Clements p1
Transient performance of inverter systems. S.R.Bowes, J.Clare and R.R.Clements p301

CONTROL EQUIPMENT AND APPLICATIONS

Closed-loop control of stepping motors: prediction and realisation of optimum switching angle. P.P.Acarnley and P.Gibbons p211
Inverter regulation by transformer tap changing. E.S.Tez, J.Clarke and I.R.Smith p315
Microprocessor-controlled separately excited DC-motor drive system. K.P.Gokhale and G.N.Revankar p344
State-space compensation applied to the control of a current-fed induction motor. B.de Fornel, M.Pietrzak-David and M.Gauvrit p221

CONVERTORS

Performance evaluation of a DC motor fed from an asymmetrical single-phase bridge. C.C.Okoro p289
Performance of current-fed inverter system with controlled flywheeling applied to supply convertor. W.Drury, B.L.Jones and J.E.Brown p262
Terminal behaviour of the uncontrolled R-L fed 3-phase bridge rectifier. D.J.Tylavsky and F.C.Trutt p337

EDDY CURRENTS

Analysis and performance of eddy-current brakes with ferromagnetic loss drums Part 1: Non salient-pole brakes. K.Venkataratnam and M.S.Abdul Kadir p125
Analysis and performance of eddy-current brakes with ferromagnetic loss drums Part 2: Salient-pole brakes. K.Venkataratnam and M.S.Abdul Kadir p132
Eddy-current distribution in cylindrical structures caused by rotating magnetic fields. P.P.Yannopoulos-Lascaratos and J.A.Tegopoulos p64

ELECTROMAGNETICS

Currents and potentials in earth-return circuits exposed to alternating current electric railways. W.Machczyński p279

ENERGY CONVERSION AND STORAGE

Characteristics of a small wind-power system with DC generator. T.Suzuki, H.Okitsu and T Kawahito p217

INDUCTION MOTORS

Analysis of end effects in a linear induction motor by the Wiener-Hopf technique. K.Venkataratnam and T.P.Rao p364
Analysis of the induction motor (An). Part 1—Steady-speed operation. A.P.Russell and I.E.D.Pickup p229
Analysis of the induction motor (An). Part 2—Damping and synchronising torque production. A.P.Russell and I.E.D.Pickup p238
Analysis of the induction motor (An). Part 3—Power/frequency relationships. A.P.Russell and I.E.D.Pickup p243
Cage-rotor induction motor with unity power factor. E.R.Laithwaite and S.B.Kuznetsov p143
Comparison of 3-dimensional and 1-dimensional calculation of the thrust of a sector motor. A.Hameed, R.Belmans, W.Geysen, H.Jordan and A.Vandenput p82
End effects in series-wound linear induction motors. K.J.R.Wilkinson p35
New form of composite-rotor induction motor for fan drives. B.J.Chalmers and E.S.Hamdi p27
Optimum designs of 1:2 pole-changing motor. K.C.Rajaraman and K.G.Betigeri p151
Performance of current-fed inverter system with controlled flywheeling applied to supply convertor. W.Drury, B.L.Jones and J.E.Brown p262
Performance of induction motor driven from self-commutating inverter. D.B.Watson p248
State-space compensation applied to the control of a current-fed induction motor. B.de Fornel, M.Pietrzak-David and M.Gauvrit p221
Steady-state analysis of 3-phase cage motors with rotor-bar and end-ring faults. S.Williamson and A.C.Smith p93
Stray loss in solid-rotor induction machines. E.Spooner p181
Theory and design of linear induction motors with steel reaction plates. V.V.Vadher p271

INSULATORS AND INSULATION

Evaluation of plastics insulators for use on British Railways 25 kV overhead line electrification. A.Bradwell and J.C.G.Wheeler p101

LINEAR MOTORS

End effects in series-wound linear induction motors. K.J.R.Wilkinson p35
Theory and design of linear induction motors with steel reaction plates. V.V.Vadher p271

MAGNETIC DEVICES AND PROPERTIES

Slotless construction for small synchronous motors using samarium cobalt magnets. D.E.Hesmondhalgh and D.Tipping p251

MAGNETIC FIELDS

Comparison of 3-dimensional and 1-dimensional calculation of the thrust of a sector motor. A.Hameed, R.Belmans, W.Geysen, H.Jordan and A.Vandenput p82
Eddy-current distribution in cylindrical structures caused by rotating magnetic fields. P.P.Yannopoulos-Lascaratos and J.A.Tegopoulos p64

MODULATION

Technique for pulse elimination in pulsewidth-modulation inverters with no waveform discontinuity. D.Grant and R Seidner p205

MOTORS

Analysis of the induction motor (An). Part 2—Damping and synchronising torque production. A.P.Russell and I.E.D.Pickup p238
Delta inverter. P.D.Evans, R.C.Dodson and J.F.Eastham d177
Experience with London Transport's traction motors. L.C.Thorn d88
Manley-Rowe relationships and parametric oscillatory motion in electromechanical devices (The). B.H.Smith d373
Microprocessor-controlled separately excited DC-motor drive system. K.P.Gokhale and G.N.Revankar p344
Performance evaluation of a DC motor fed from an asymmetrical single-phase bridge. C.C.Okoro p289
Slot-discharge activity in air-cooled motors and generators. R.J.Jackson and A.Wilson p159
Steep-fronted switching voltage transients and their distribution in motor windings. Part 1: System measurements of steep-fronted switching voltage transients. K.J.Cornick and T.R.Thompson p45
Steep-fronted switching voltage transients and their distribution in motor windings. Part 2: Distribution of steep-fronted switching voltage transients in motor windings. K.J.Cornick and T.R.Thompson p56

POWER ELECTRONICS

Analysis of the induction motor (An). Part 3—Power/frequency relationships. A.P.Russell and I.E.D.Pickup p243
Computer-aided design of PWM inverter systems. S.R.Bowes and R.R.Clements p1
Control method for compensation of switching delays in transistors. D.W.Auckland, C.F.Foo and R.Shuttleworth p199
DC power-supply systems with inverting substations for traction systems using regenerative brakes. T.Suzuki p18
Delta inverter. P.D.Evans, R.C.Dodson and J.F.Eastham d177
Derating of semiconductor fuselinks for use in high-frequency applications. A.F.Howe and C.M.Jordan p111
High reliability 3-phase variable-frequency inverter. B.W.Williams p353
Inverter AC-drive efficiency. R.M.Green and J.T.Boys p75
Inverter regulation by transformer tap changing. E.S.Tez, J.Clarke and I.R.Smith p315
Performance of current-fed inverter system with controlled flywheeling applied to supply convertor. W.Drury, B.L.Jones and J.E.Brown p262
Protection methods for power-transistor circuits. P.D.Evans and B.M.Saied p359
Some optimum shapes for toroidal inductors. P.N.Murgatroyd p168
Technique for pulse elimination in pulsewidth-modulation inverters with no waveform discontinuity. D.Grant and R Seidner p205
Transient performance of inverter systems. S.R.Bowes, J.Clare and R.R.Clements p301

POWER SYSTEMS AND PLANT

DC power-supply systems with inverting substations for traction systems using regenerative brakes. T.Suzuki p18
Simulation of a transformer/rectifier unit for aircraft power-supply systems. J.G.Kettleborough, I.R.Smith and B.A.Fanthome p323

PULSE-CODE MODULATION

Computer-aided design of PWM inverter systems. S.R.Bowes and R.R.Clements p1

RAILWAY ELECTRIFICATION AND TRANSPORTATION

Currents and potentials in earth-return circuits exposed to alternating current electric railways. W.Machczyński p279
DC power-supply systems with inverting substations for traction systems using regenerative brakes. T.Suzuki p18
Evaluation of plastics insulators for use on British Railways 25 kV overhead line electrification. A.Bradwell and J.C.G.Wheeler p101
Experience with London Transport's traction motors. L.C.Thorn d88
Stray loss in solid-rotor induction machines. E.Spooner p181

RELUCTANCE MOTORS

Vernier reluctance motor. R.Bourne p43

SIMULATION

Mathematical model and characteristics of parametric transformers. E.S.Tez and I.R.Smith p117
Simulation of a transformer/rectifier unit for aircraft power-supply systems. J.G.Kettleborough, I.R.Smith and B.A.Fanthome p323

STEPPING MOTORS

A circuital method for the prediction of pull-out torque characteristics of hybrid stepping motors. A.P.Russell and I.E.D.Pickup p330
An alternative energisation mode for the 4-phase, variable-reluctance stepping motor. A.P.Russell and I.E.D.Pickup p355
Closed-loop control of stepping motors: prediction and realisation of optimum switching angle. P.P.Acarnley and P.Gibbons p211

SUPERCONDUCTIVITY

Eddy-current distribution in cylindrical structures caused by rotating magnetic fields. P.P.Yannopoulos-Lascaratos and J.A.Tegopoulos p64

SYNCHRONOUS MOTORS

Analysis of the induction motor (An). Part 1—Steady-speed operation. A.P.Russell and I.E.D.Pickup p229
Analysis of the induction motor (An). Part 2—Damping and synchronising torque production. A.P.Russell and I.E.D.Pickup p238
Slotless construction for small synchronous motors using samarium cobalt magnets. D.E.Hesmondhalgh and D.Tipping p251

TRANSDUCERS

Limited motion rotary actuators of the toroidal-stator, permanent-magnet rotor type. C.Dawson and HR.Bolton p190

TRANSFORMERS

Determination of transformer magnetising characteristic from a Fourier analysis of the exciting-current waveform. A.R.Kelkar and S.G.Galgali p180
Dynamic response of a power-transformer winding under axial short-circuit conditions (Summary). D.A.Quinney p87
Inverter regulation by transformer tap changing. E.S.Tez, J.Clarke and I.R.Smith p315
Mathematical model and characteristics of parametric transformers. E.S.Tez and I.R.Smith p117
Simulation of a transformer/rectifier unit for aircraft power-supply systems. J.G.Kettleborough, I.R.Smith and B.A.Fanthome p323

Book Reviews

Electromagnetic levitation and suspension techniques: B.V. Jayawant p354
Thyristor DC drives: P.C. Sen p299
